MFD08-13

Update site header text

To Do

Improve work item

Description

- Description: Change the top header to: "Mini Finance — Simple Personal Budget Tracker".
- Acceptance Criteria (Gherkin):
 - Given that I open the homepage, when the page loads, the header shows exactly "Mini Finance — Simple Personal Budget Tracker".
 - And the change is visible on the EC2 URL.

In 5–8 lines, explain how your setup reflects Scrum **artifacts** (Epic/Product Backlog/Sprint Backlog), **events** (Sprint Planning), and **pillars/values** (give 1–2 examples).

My setup mirrors Scrum artifacts by treating the **Epic** as the larger project vision, breaking it into a **Product Backlog** of high-level tasks, and then refining those into a **Sprint Backlog** with work planned for the current cycle. The act of organizing and prioritizing that backlog demonstrates **Sprint Planning**, where goals are clarified and commitments made. Transparency is shown through clearly defined and visible work, while **Adaptation** occurs when the scope or approach is adjusted based on progress. Values like **Commitment** show in your dedication to delivering the backlog, and **Focus** is precise in how you concentrate only on the tasks chosen for the sprint.
